

Abdy Fekadu

Full Stack Developer (Java, Typescript) Fullstack Developer Java, SpringBoot, JavaScript, Angular with 2+ years of experience building microservice based systems to streamline internal processes in banks. Blue Card eligible.

WORK EXPERIENCE

Cooperative Bank of Oromia, Associate Core Banking Applications Administrator & Software Developer

One of the top banks in Ethiopia Nov 2022 - present

- Administered core banking applications 24/7 to ensure optimal performance and reliability.
 - Developed an SMS sending system that sends messages to hundreds of thousands of customers. It is now in its initial phase and used to send messages on holidays. We also effectively used it to send messages to 500k + customers to advertise a product and as a result attracted many customers. Tech Skill: Java, Spring Batch, PostgreSQL RabbitMQ
 - Led development of Single-Sign-On/Employee Management System, a microservice system. It is integrated with Active Directory so employees can login using their computer credential. Holds 7k+ employees and its role based so let users access different modules based on role. This system holds 6+ modules used to enhance the internal work of the bank. Benefit of these modules includes:
 - 🌱 Replaced usage of paper by 100% in sub process called internal Control, saving a lot of money,
 - 🌱 Managed the tasks that involves scheduling different people on different day having features like reminder by SMS
 - 🌱 Escalation of works that weren't done on the due date. Used Outlook messages to escalate
- Tech Skills: Java, Spring Boot, TypeScript, Angular, Active Directory, PostgreSQL
- Fixed real world problem by developing a compliance check system used to do quick background search on potential customers before he opens an account. Prior to this bank only had two separate systems to do local screening; now it includes 8 more sanction lists and also includes international lists like EU Sanction List. Tech Skills: Java, Spring Boot, TypeScript, Angular

Berhan Bank, Addis Ababa, Ethiopia— Full Stack Developer

Fast growing bank Sep 2021 - Oct 2021

- ⚡ Took charge of various daily tasks, including observing and assisting with ATM maintenance when machines were placed or not working.
- ⚡ Independently created a software tool for processing raw transaction data and visualizing the information.
